PROFILE

Self-Motivated, adaptable and reliable web developer with experience in building responsive websites to fit client needs. My knowledge in HTML, CSS and JavaScript has given me a great base to learn front-end frameworks like bootstrap, react, and tailwind while my knowledge in PHP allows my websites to have working contact sections. Whether I am building a website from scratch or enhancing an existing one, I am dedicated to delivering innovative solutions that not only meet but exceed expectations.

WORK EXPERIENCE

Web Developer
RayDunn Web Solutions, Business Owner/Creator   2023 – present

- Develop responsive websites using HTML, CSS, Sass, JavaScript, PHP, and the Bootstrap Framework.
- Work with clients throughout the development process to make sure the project is compliant with their business model.
- Implement SEO best practices to content of each website by using keyword research and meta descriptions.
- Create clean and organized code to allow collaboration and reusability for future products.
- Set up domains and complete domain transfers via DNS and/or nameservers to our hosting plan.

Projects

_____

RayDunn Web Solutions Website
Website | www.raydunnsolutions.com/

- Developed and designed with HTML, CSS, Sass, JavaScript, and PHP.
- Implemented Bootstrap with Front end layout for responsiveness and JavaScript libraries: animate on Scroll (AOS), GLightbox, and Swiper.
- Used PHP for the contact section to send emails from the website via the PHPMailer code library.

Clean Slate Pressure Washing Website
Website | cleanslatepressurewashingnola.com/

- Website for a client of RayDunn Web Solutions for a pressure washing company in south Louisiana.
- Learned how to collaborate with the client directly while learning how to properly get the information needed to create a perfect UI/UX for the visitors of the site.
- Learned how to display and create all content to comply with SEO guidelines.
- Created domain name and optimized website according to audits from Google Lighthouse and Chrome DevTools.

My Portfolio Website
Web Application | www.alexrayer.com/

- Designed web application using React.
- Used TypeScript and Next.js for server-side rendering.
- Deployed application through Vercel.
